# 1. Your Role as District Captain

As a District Captain, you are the community liaison for your assigned HIBCW district. You serve as the first point of contact between local businesses, residents, and the broader HIBCW network. Your role is built around four responsibilities:

- Monitoring incidents reported within your district
- Reviewing and acting on membership applications for your area
- Keeping your district's members informed through timely alerts
- Maintaining accurate member and captain records for your area
- Coordinating with HIBCW admins when escalation is needed

> 👮 **Your Access is Scoped to Your District**
>
> When you sign in, the admin panel automatically filters everything to your district. You will only see incidents, members, and applications that belong to your assigned area. This is by design — it keeps things focused and ensures member privacy across districts.

# 2. Signing In to the Admin Panel

There are two versions of the admin panel — a full desktop version and a mobile-optimized version. Both use the same login credentials.

### Desktop Admin

- Go to your Vercel deployment URL and add “/admin.html” to the address (e.g., hibcw.vercel.app/admin.html)
- Enter your email address and password
- Click “Sign In →”

### Mobile Admin

- Visit hibcw.vercel.app/admin-mobile.html on your phone or tablet
- Alternatively, visit admin.html on a mobile device — a prompt will appear offering to redirect you to the mobile version
- Same credentials as the desktop version

> 🔑 **Forgot Your Password?**
>
> On the sign-in screen, tap or click "Forgot password?" and enter your email address. A reset link will be sent to your inbox. If you do not receive it within a few minutes, check your spam folder or contact your HIBCW administrator.

### After Signing In

Once logged in, the panel automatically:

- Identifies you as a Captain and scopes all data to your district
- Takes you directly to the Incidents screen (desktop: Districts view)
- Displays your name and district in the header or dashboard area
- Hides buttons and features that are reserved for admins

# 3. Your Dashboard

When you navigate to the Districts screen, your personal captain dashboard is displayed at the top before the district cards. This gives you a quick snapshot of your district at a glance.

## 3.1 Stats Tiles

Four stat tiles show live counts for your district:

- Active — number of currently active (unarchived) incidents in your district
- Month — incidents reported this calendar month
- Week — incidents reported in the current week
- Members — total verified HIBCW members in your district

## 3.2 Recent Incidents

A quick list of the 8 most recent incidents in your district, color-coded by severity. Click or tap any row to open the full incident detail view. Archived incidents are noted inline.

## 3.3 Alert Composer & Log

The dashboard includes a text area to compose and send a district alert, as well as a log of your most recent alerts. See Section 4.4 for full instructions on sending alerts.

# 4. What You CAN Do — Full Instructions

## 4.1 Viewing & Searching Incidents

The Incidents screen shows all active incidents in your district. You can search and filter to find specific reports.

### On Desktop (admin.html)

1. Click “Districts” in the left sidebar to go to the Districts view, or navigate to the Incidents tab
2. Your district’s incidents are automatically pre-filtered
3. Use the search bar to search by type, address, or description
4. Use the Type and Status dropdowns to narrow results
5. Click “View” on any row to open the full incident detail panel

### On Mobile (admin-mobile.html)

6. The Incidents screen is the default landing screen after login
7. Use the search bar at the top to filter by keyword
8. Use the Type and Status dropdowns to narrow results
9. Tap any incident card to open the detail sheet

> 💡 **Tip**
> The Status dropdown defaults to "Active." Switch it to "Archived" to review resolved incidents, or choose "All" to see everything at once.

## 4.2 Archiving & Restoring Incidents

You can archive incidents in your district when they have been resolved, are duplicates, or are no longer relevant to the active map. Archived incidents are removed from the public-facing map but are not deleted.

### To Archive an Incident

**Step 1 Open the Incident**

Find the incident in the list or dashboard
Click or tap “View” to open the detail panel

**Step 2 Archive It**

Click or tap the “📦 Archive” button in the action row at the bottom of the detail panel

Confirm when prompted

The incident will be removed from the active list and the public map

### To Restore an Archived Incident

10. Change the Status filter to “Archived”
11. Find the incident and open it
12. Click or tap “↩️ Restore”
13. The incident returns to active status and reappears on the public map

> ⚠️ **Important**
>
> Archiving is reversible. Deleting is permanent and is reserved for admins only. If you believe an incident should be permanently deleted (e.g., it was submitted in error), contact your HIBCW administrator.

## 4.3 Adding Follow-Up Notes

Notes allow you to log follow-up information on an incident — such as police contact, community feedback, or status updates — without altering the original report.

### Step 1 Open the Incident Detail

Find and open any incident in your district

Scroll to the bottom of the detail panel to find the “📝 Follow-Up Notes” section

### Step 2 Write Your Note

Type your note in the text field at the bottom of the notes section

Click “Add” or press Enter to save it

Your note will appear in the log with your name and timestamp

Notes are visible to all admin and captain users. They are not shown on the public-facing site.

## 4.4 Sending District Alerts

District alerts allow you to communicate directly with your community. Once sent, alerts appear on the public-facing site — on the map page and in the "📢 Alerts" section of the mobile app. Alerts are visible to everyone who visits the site, not just members.

### From the Desktop Dashboard

14. Navigate to the Districts screen (left sidebar)
15. Your dashboard appears at the top with the "📢 Send District Alert" box
16. Type your message in the text area
17. Click "📤 Send Alert"
18. The alert will appear in your alert log and immediately on the public site

### From the Mobile Dashboard

19. Tap the "📍 Districts" tab in the bottom navigation
20. Your dashboard is shown at the top of the screen
21. Type your message in the alert composer box
22. Tap "📤 Send Alert"

> ✍️ **Writing Effective Alerts**
>
> Keep alerts concise and specific. Include: what happened or is happening, which area is affected, what members should do or watch for, and any relevant dates or times. Example: "Increased vehicle break-ins reported along Kamehameha Ave this week. Please secure valuables and report any suspicious activity."

> 🌐 **Public Visibility**
>
> Alerts appear on the public site within seconds of being sent. They are displayed with your name and the date/time. Do not include sensitive personal information, names of individuals, or unconfirmed details in an alert.

## 4.5 Cancelling an Alert

If an alert was sent in error or is no longer relevant, you can cancel it. Cancelling removes it from the public site immediately.

23. Open the Districts screen and scroll to your dashboard
24. Find the alert you want to remove in the "📋 Recent Alerts" log
25. Click or tap the "✕ Cancel" button on the right side of the alert
26. Confirm the cancellation when prompted
27. The alert is immediately removed from the public site

> ⚠️ **Note**
> Cancellation is permanent — the alert cannot be restored once removed. If you need to send a correction, cancel the original and send a new alert with updated information.

## 4.6 Viewing & Searching Members

You can view all verified HIBCW members in your district. This is useful for knowing who in your area is part of the network.

### On Desktop

28. Click “Members” in the left sidebar — results are automatically filtered to your district
29. Use the search bar to find members by name, email, business, or phone
30. Member cards show name, email, business name, phone, and assigned captain

### On Mobile

31. Tap the “👥 Members” tab in the bottom navigation
32. Use the search bar and district filter at the top to find members
33. Tap any member card to see their full contact details

Member management (adding, editing, removing members) is reserved for admins. If a member in your district needs to be updated or removed, contact your HIBCW administrator.

## 4.7 Managing Applications

You can view, approve, and reject membership applications submitted by businesses in your district. This gives you direct authority over who joins the HIBCW network in your area.

- Applications are automatically filtered to your district
- You can see pending, approved, and rejected applications
- You can approve pending applicants, reject them, revoke approved members, or re-approve previously rejected ones
- Deleting an application permanently is reserved for admins

### To Approve an Application

**Step 1 Find the Application**

Navigate to the Applications screen (desktop: left sidebar → Applications; mobile: 📋 Apply tab)

The filter defaults to "Pending" — pending applications for your district will appear here

**Step 2 Review the Details**

Check the applicant's name, business name, address, email, and phone

If they included a note, it appears below the contact details

Verify this is a legitimate business in your district

**Step 3 Approve**

Click or tap "✅ Approve"

Confirm when prompted

The applicant is added to the verified members list and their report submissions will show a "✅ Verified Member" badge on the public map

### To Reject an Application

34. Find the pending application in your district
35. Click or tap "❌ Reject"
36. Confirm when prompted — the application status changes to Rejected

### To Revoke an Approved Member

37. Change the status filter to "Approved"
38. Find the member and click "Revoke"
39. Their verified status is removed and they are removed from the member list

> ⚠️ **Delete is Admin-Only**
> You can approve, reject, revoke, and re-approve applications in your district. Permanently deleting an application record is reserved for HIBCW administrators.

## 4.8 Viewing the Districts & Directory

The Districts screen gives you a full picture of all nine HIBCW districts, their assigned captains, and contact information.

### Overview Tab

- Shows a card for each district with the captain's photo, name, business, and contact information
- Displays district stats: member count, incidents this month/week/today, and last reported date
- Shows a type breakdown bar chart for active incidents in each district
- Includes a "👥 View Members" button that opens the member roster for any district

### Directory Tab

- A searchable list view showing: district, captain name, business, email, and phone for all 9 districts
- Tap the ☉ print button to generate a printable PDF directory of all captains

### Member Roster (from district card)

- Tap "👥 View Members" on any district card to open the roster for that district
- Includes a search bar and a "☉ Print Roster" button to export a formatted PDF

# 5. What You CANNOT Do

The following actions are reserved for HIBCW admins and superadmins. This ensures data integrity, member privacy, and consistent management of the platform across all districts.

- Permanently delete incidents (archiving is the captain equivalent)
- Add or remove verified member emails from the system
- Edit member profile details (name, address, business info, district assignment)
- Permanently delete applications
- Export incident or member data as CSV
- View incidents, members, or applications from other districts
- Send district alerts to districts other than your own
- Access the Manage Admins screen (superadmin only)
- Invite or remove other captains or admin accounts
- Upload or change the captain photo for other districts

📞 **Need an Admin Action?**

If you need something done that is outside your permissions — such as removing a member, correcting a profile, or permanently deleting a record — contact your HIBCW administrator. They can act quickly on your behalf.

# 6. Permission Summary Table

This table summarizes everything a District Captain can and cannot do in the HIBCW admin panel.

| ✅ Captains CAN | 🚫 Captains CANNOT |
|---|---|
| View incidents in your district | View incidents in other districts |
| Archive incidents in your district | Permanently delete incidents |
| Restore archived incidents in your district | Bulk archive or delete incidents |
| Add follow-up notes to any incident | Edit or delete original incident reports |
| View verified members in your district | Add or remove member email addresses |
| View member contact details | Edit member profiles or district assignments |
| View applications in your district | Permanently delete applications |
| Approve or reject applications in your district | Approve or reject applications from other districts |
| Send district alerts to your district | Send alerts to other districts |
| Cancel alerts you have sent | Delete alerts sent by admins or other captains |
| View all 9 district captain cards | Change captain assignments for other districts |
| View & print the captain directory | Export incident or member CSVs |
| View member roster for any district | Manage admin or captain accounts |
| Update your own captain photo | Invite or remove other admin users |

# 7. Desktop vs. Mobile Admin

Both admin versions share the same data and permissions. The mobile version is optimized for phone use — it uses a bottom navigation bar and swipe-friendly bottom sheets instead of a sidebar and modals.

| Feature | Desktop (admin.html) | Mobile (admin-mobile.html) |
|---|---|---|
| **Navigation** | Left sidebar with nav buttons | Bottom tab bar (6 tabs) |
| **Incident details** | Right-side modal overlay | Slide-up bottom sheet |
| **Captain dashboard** | Top of the Districts view | Top of the Districts tab |
| **Send alert** | Dashboard text area | Dashboard text area |
| **Member roster** | Click “View Members” on district card | Tap “View Members” on district card |
| **Print directory** | Click ☉ Print PDF in toolbar | Tap ☉ icon in Districts tab bar |
| **Theme toggle** | Button in header bar | More tab → Theme toggle |
| **Sign out** | Button in header bar | More tab → Sign Out |

# 8. Tips & Best Practices

## Staying on Top of Your District

- Check the admin panel at least once a day during active periods — new incidents appear in real time
- Review the “Recent Incidents” section on your dashboard each morning for an overnight summary
- Use the “This Week” stat tile to gauge whether activity is trending up or down in your district

## Archiving Responsibly

- Archive an incident when it has been resolved, confirmed as a duplicate, or is no longer relevant to active community awareness
- Add a follow-up note before archiving to document why — e.g., “Resolved, HPD confirmed report filed”
- Do not archive incidents solely because they are old — recurring patterns are valuable data

## Sending Effective Alerts

- Only send alerts for significant, actionable information — avoid over-alerting, which can cause members to tune out
- Be specific: include location, type of incident, and what to watch for
- Cancel outdated alerts promptly so the public feed stays current and relevant
- If you’re unsure whether something warrants an alert, consult your HIBCW administrator first

## Keeping Your Profile Current

- Make sure your captain photo is up to date — it appears on the district directory and builds community trust
- If your phone number or email changes, contact your HIBCW admin to update your profile

# 9. Getting Help

If you encounter a problem, need an action that is outside your permissions, or have questions about your role, use the following contacts:

| Issue | Who to Contact |
|---|---|
| **Can't log in / password reset** | Use the "Forgot password?" link on the sign-in screen, or contact your HIBCW administrator |
| **Need to delete an incident permanently** | Contact your HIBCW administrator with the incident ID or details |
| **Member profile needs updating** | Contact your HIBCW administrator with the member's email and the correction needed |
| **Technical bug or site issue** | Contact your HIBCW administrator or email hibcw@kiaahilo.org |
| **New business wants to join HIBCW** | Direct them to apply at hibcw.vercel.app — click "Join HIBCW" |
| **Emergency crime in progress** | Call 911 immediately. Do not use the admin panel for emergencies. |

**Thank you for your service to the Hawaii Island business community.**
